

# CNC150 AUTOGAUGE

CNC150 is an economical, simple-to-use control that incorporates the most popular features used in our 30-plus years experience in the pressbrake backgauging business.

CNC150 will control any of the Automec backgauge configurations as either a 1-axis (backgauge), 2-axis (Ram Control) or 3-axis (programmable gauge bar height).

# CNC 150 AUTOGAUGE CONTROL

## FEATURES

- **Incremental Corrections**—dimensions can be corrected by adding or subtracting incrementally from the existing dimension.
- **Bend Allowance**—All backgauge dimensions can be offset with one data entry up to  $\pm .393"$
- **Ram Depth Mode**—Programmable in inches or millimeters from the flat metal calibration point. On most hydraulic pressbrakes, the top of stroke can be varied from bend to bend and a ram slow down point can be programmed for each job.
- **Ram Offset**—all of the Ram depths can be offset with one data entry up to  $\pm .393"$
- **Backgauge Retract/Delay**—Backgauge can be programmed to retract away from the die a specified time and distance to allow the operator time to reposition the workpiece.
- **Backgauge Retract on Pinch Point**—On 2-axis hydraulic brakes this feature allows you to program the backgauge to retract once the workpiece is pinched in order to clear reverse bends. Both time and distance of retract can be programmed separately for each bend.
- **Self Diagnostics**—error codes appear for programming mistakes or system malfunction.

## TECHNICAL SPECIFICATIONS

Up to 11 digit part numbers can be assigned  
150 jobs (00 to 150)  
20 bends per job  
Cycles — up to 9 per bend  
Programmable delay/retract between bends (0-9 sec.)  
1, 2 or 3 axis  
.001" resolution  
Red L.E.D. display  
In/mm conversion  
Tactile feel pushbuttons  
30 day battery back-up  
Input power — 115 VAC  $\pm 10\%$  50/60 HZ, 7A MAX  
Width 15" x Height 11" x Depth 4"  
Weight 10 lbs.
